GitHub | Portfolio | Live AI Career Copilot (Render)

PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering (Data Science) undergraduate with hands-on experience building, integrating, and deploying AI-powered full-stack web applications using Python and Django. Experienced in PostgreSQL, REST APIs, Generative AI integration, prompt engineering, and Power BI dashboard development. Actively seeking an entry-level role in software development, backend engineering, or AI application development.

TECHNICAL SKILLS

Programming Languages: Python, SQL
Web Technologies: HTML5, CSS3, JavaScript
Backend & Frameworks: Django, REST APIs, Service-Layer Architecture, OOP
Databases: PostgreSQL, MySQL, SQLite, database connectivity, query optimization
AI & Generative AI: LLM API integration, Generative AI, Prompt Engineering, structured AI output handling
Data & Analytics: Power BI, data visualization, business dashboard development, data analysis
Software Engineering: SDLC, debugging, modular development, version control (Git/GitHub)
Tools & Platforms: Git, GitHub, VS Code, Cursor, Firebase, Render, Vercel, Bolt, Lovable, Overleaf

PROJECTS

AI Career Copilot *Python · Django · PostgreSQL · Generative AI · REST APIs · Render*
Live App | GitHub Repository

- Developed and deployed a full-stack AI-powered career intelligence platform using Python and Django, backed by PostgreSQL, and hosted live on Render — serving real users in production.
- Integrated Generative AI APIs to analyze uploaded resumes, extract and normalize skills, detect career skill gaps, generate personalized interview questions, and produce customized learning roadmaps.
- Built secure REST APIs with user authentication, session management, CSRF protection, rate limiting on AI endpoints, and structured validation of LLM-generated outputs before database storage.
- Designed a Skills Intelligence module to normalize AI-extracted skills (e.g., `Python`, `python`, `Python Programming` resolved to one canonical skill) for consistent career analysis.
- Delivered the full product loop — Resume Analysis → Skill Gap Detection → Interview Prep → Career Roadmap → Progress Tracking — in a single unified platform.

Power BI Business Analytics Dashboard *Power BI · MySQL · Python · Data Analysis*

- Built interactive business dashboards from raw datasets, converting data into visual KPIs, trend reports, and analytical insights; presented findings in an academic competition, securing **2nd place**.

Socratic AI Chatbot *Python · Generative AI · Prompt Engineering*

- Designed and built an AI chatbot that teaches through Socratic questioning; awarded **1st Place at the Prompt Engineering Hackathon 2025** — led the project team end-to-end from concept to demo.

Personal Portfolio Website *HTML · CSS · JavaScript · AI-assisted Development* | Live Portfolio

- Designed and deployed a responsive portfolio website showcasing projects, achievements, and technical profile.

EDUCATION

B.Tech — Computer Science and Engineering (Data Science) **CGPA: 7.72 / 10**
Avanthi Institute of Engineering and Technology, Andhra Pradesh 2023 – 2027 (Expected)

PROFESSIONAL TRAINING

Generative AI & Python Backend Development *Softworld Training Institute (Ongoing)*
Intensive training covering Generative AI with Python, Django backend development, MySQL, Power BI, SDLC, debugging, and database connectivity; practical work includes AI-integrated applications and business dashboards.

ACHIEVEMENTS & CERTIFICATIONS

- **1st Place — Prompt Engineering Hackathon 2025:** Built the Socratic AI Chatbot; led the team and won against competing participants.
- **2nd Place — Data Analytics Presentation Competition:** Demonstrated Power BI dashboards and data storytelling to a panel of judges.
- **Live Production Deployment:** AI Career Copilot deployed and accessible at ai-career-copilot-78ip.onrender.com.
- **NPTEL Certification:** Internet of Things (IoT).

SOFT SKILLS

Analytical Thinking | Problem Solving | Team Collaboration | Leadership | Communication | Time Management | Adaptability | Ownership
